Brasil Telecom Participações S.A.

Brasil Telecom Participações S.A. announces 2Q02 consolidated results

Brasília, August 9, 2002 - **Brasil Telecom Participações S.A. (BOVESPA: BRTP3/BRTP4; NYSE: BRP)** announces its consolidated results for the second quarter of 2002 (2Q02). **The result** was elaborated in accordance with CVM Instruction nº 247/96 and **consolidate the performance of Brasil Telecom S.A.**

HIGHLIGHTS OF THE RESULTS

- ✓ **Plant** – At the end of 2Q02, **Brasil Telecom's installed plant** reached 10,505 thousand lines, stable in comparison to the plant observed at the end of 1Q02. **Lines in service (LIS)** reached 8,940 thousand at the end of 2Q02, 1.0% above 1Q02, contributing for the growth in the **utilization rate**, which reached 85.1% at the end of June, 0.3 p.p. above 1Q02.
- ✓ **ADSL lines** – At the end of 2Q02, Brasil Telecom reached 101.5 thousand **ADSL lines sold**, a growth of 84,3 thousand lines compared to 2Q01. Comparing to 1Q02, the growth was 55.9%. Considering the number of **ADSL lines installed**, the Company reached 89.8 thousand, which represents the highest **ratio installed/sold** since the beginning of the year: 88.5%.
- ✓ **Net revenues** in the 2Q02 totaled R\$1,737.9 million, a growth of 6.1% in comparison to 1Q02. When compared to 2Q01 net revenues grew 14.0%. **Net revenues/Avg. LIS/Month** grew 4,3% in the 2Q02 to R\$65.1.
- ✓ **Higher market share** – In the 2Q02, Brasil Telecom had 86.4% average market share in the intra-sector DLD segment and 72.8% in the intra-region, representing gains of 1.3 p.p. and 1.6 p.p., respectively, compared to 1Q02 average.
- ✓ **Data communication revenues** in the 2Q02 reached R\$117.2 million, 13.4% above 1Q02, representing 4.9% of total gross revenues. When compared to 2Q01, data communication revenues grew 44.4%.
- ✓ **Losses with accounts receivable** amounted to R\$65.8 million in the 2Q02, representing 2.7% of gross revenues. This ratio represents a drop of 0.2 p.p. in comparison to 1Q02 and can be attributed to the actions implemented by Brasil Telecom targeting the recovery of losses and the reduction of bad debt.
- ✓ **EBITDA** – In the 2Q02, EBITDA reached R\$822.6 million, 12.5% above the R\$731.4 million posted in the 1Q02, growth that was fueled by the increase in revenues and costs control. **EBITDA margin** reached 47.3%, increasing 2.7 p.p. compared to 1Q02. **EBITDA/Avg. LIS/Month** reached R\$30.8, a growth of 10.6% over 1Q02.
- ✓ **Consolidated net debt** of R\$2,813.9 million in 2Q02, representing a **financial leverage** of 46,3%. **Dollar denominated debt** amounted to R\$194.1 million at the end of 2Q02. Brasil Telecom Participações had **hedge** mechanism for 56.5% of that debt, being all debt maturing up to December 2003 hedged against foreign exchange variation. At the end of June, the **debt average cost** was 14.64% and the **average term** was approximately 57 months.
- ✓ **Productivity** of 1,459 LIS/employee at the end of 2Q02, compared to 1,244 (+17.3%) in 1Q02. The higher productivity ratio in the quarter was a result of the higher number of lines in service combined with a net reduction of 989 employees. During 2Q02, gross employee reduction reached 1,252, generating **lay-off expenses** of R\$3.1 million and **unemployment compensation** of R\$14.9 million, accounted as personnel expenses.

Additional Lines Installed

The addition of 63 thousand lines installed in 2Q02, compared to 427 thousand in the previous quarter, is due to the fact that, in the 1Q02 Brasil Telecom concentrated its efforts in increasing the capillarity of its network, necessary to meet the current parameters defined in the Concession Contract of Universalization Goals (PGMU): activation of lines within a maximum of 4 weeks and change of address within the maximum of 3 days. The future growth of the plant installed will depend on demand attendance and on meeting universalization and quality goals, established in the concession contracts, **considering that since December 2001 there was no waiting list. At the end of June, Brasil Telecom had 40.3 thousand ongoing orders.**

Graph 1: Plant

Additional Lines in Service

The 85 thousand additional lines in service resulted from the 490 thousand new lines activated (-8.9% compared to 1Q02) combined with the 405 thousand lines cancelled (+26.2% compared to 1Q02) during 2Q02.

Graph 2: Activations and Cancellations (Thousand)

ADSL

At the end of the 2Q02, **Brasil Telecom reached the mark of 101.5 thousand ADSL accesses sold**, which represented an increase of **55.9%** in relation to the 1Q02. Therefore, Brasil Telecom became the number two broadband operator in Latin America.

Graph 3: ADSL Accesses (thousand)

QUALITY GOALS

Table 3: Quality Goals Achieved

Quality Goals

In the months of May and June 2002, Brasil Telecom met all 35 quality goals. In the month of April, the Company did not meet two goals:

- Address change in up to 24 hours for non-residential customers – due to the implementation of a new Activities Management System in the Rio Grande do Sul branch.
- Public Utilities Service Providers Repair Response in up to 2 hours – due to failure on the Tropic RA switch in Aquidauana, in the Mato Grosso do Sul branch, which occurred due to loss of signal between processors.

TRAFFIC

Table 4: Traffic

	2Q01	1Q02	2Q02	Var. Quarter	Var. 12 Month
Billed Local Pulses (Million)	3,455	3,153	3,425	8.6%	-0.9%
DLD Minutes (Million)	1,399	1,646	1,923	16.8%	37.4%
Fixed-Mobile Minutes (Million)	961	1,023	1,086	6.2%	13.1%
Billed Pulses/Avg LIS/Month	143.7	120.2	128.3	6.8%	-10.7%
DLD Minutes/Avg LIS/Month	58.2	62.7	72.0	14.8%	23.8%
Fixed-Mobile Minutes/Avg LIS/Month	40.0	39.0	40.7	4.4%	1.8%
Local Minutes+DLD/Avg LIS/Month	342.7	317.6	324.3	2.1%	-5.4%

Billed Local Pulses The increase of 8.6%, in the 2Q02, in comparison to the 1Q02, is due mainly to the higher average lines in service, to the greater number of business days considered in the quarter and to the seasonal effect of the 1Q02 (reduced traffic due to vacations).

DLD Traffic

The 16.8% increase in DLD traffic in the 2Q02 is attributed to the result of the advertising campaigns to the higher average lines in service and to the greater number of business days.

Brasil Telecom launched two advertising campaigns during the 2Q02, with the goal of promoting the carrier selection code - "CSP 14". The first campaign, which occurred in the beginning of the quarter, reinforced the attribute "it's from here". The second campaign, which occurred in the end of the quarter, concentrated in regaining and strengthening the image of the 14 as the "code from here", in order to protect the market share of the company, while anticipating the entrance of new competitors.

The success obtained by the advertising campaigns can be verified by the increase of 1.6 p.p. and 1.3 p.p. in the intra-region and intra-sector market shares respectively, in the 2Q02.

Graph 4: DLD Market Share

Fixed-Mobile Traffic

The fixed-mobile traffic increased 6.2% in the 2Q02 over the 1Q02, due to the higher average lines in service and to the greater number of business days.

Graph 5: Fixed-Mobile Minutes Breakdown (Millions)

BrTurbo Portal

BrT Servicos de Internet S.A. – BrTSI, a wholly owned subsidiary of Brasil Telecom, launched the BrTurbo Portal, an Internet Service Provider specialized in broadband content. The Brturbo client has additional e-mail accounts and 150MB of disc space to host files such as videos, music, pictures, photographs, personal folders and html pages. **At the end of the 2Q02, Brturbo had 56 thousand subscribers, out of which 35 thousand were Brasil Telecom’s ADSL clients.**

The traffic generated by the portal corresponds to 50% of all IP traffic of Brasil Telecom’s network. Out of that traffic, 65% are generated by users located outside Region II, proving the quality of the portal’s content.

The content’s quality is crucial, since it avoids the increase in costs from the use of other operators’ band. Each time that a user gets content outside Brasil Telecom’s network, the company needs another operator to carry this IP traffic.

iBEST

With the objective of incrementing the traffic in the Brasil Telecom network, the BrTSI subsidiary established a commercial partnership with iBEST, a portal that offers free internet access, acquiring a minority stake of approximately 13% of the total capital of the Portal. **In May 2002, BrTSI exercised the purchase option of the portal’s control, increasing its stake to 71.6% of the voting capital and 43.5% of the total capital.**

At the end of the 2Q02, the iBEST Portal had 1.3 million registered users, of which 782 thousand were added in the 2Q02. In the 2Q02, the Portal recorded a total of approximately 1 billion minutes of connection.

FINANCIAL PERFORMANCE

REVENUES

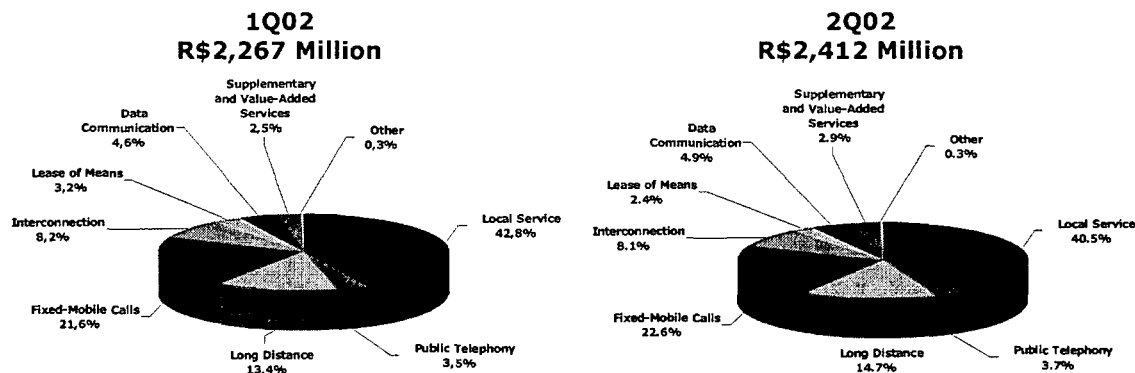

Brasil Telecom's strategy to diversify products and services by means of innovative solutions, mainly in data communications and value-added services, was verified during the 2Q02, with the launching of VPN Simples, a pioneer product offered by BrTSI.

The service, activated on April 2, 2002, permits the interconnection of addresses in different locations of the country or of the world, using any telecommunications operator that offers ADSL lines.

Table 5: Consolidated Gross Operating Revenue (R\$ Million)

R\$ Million	2Q01	1Q02	2Q02	Var. Quarter	Var. 12 Months

Other	9.7	5.7	6.6	15.5%	-32.8%
Deductions	(579.3)	(628.6)	(674.3)	7.3%	16.4%
NET REVENUES	1,524.9	1,638.5	1,737.9	6.1%	14.0%

Graph 6: Gross Revenue Breakdown

Local Services

Line installation revenue totaled R\$8.6 million in 2Q02, resulting from a decrease in the number of installations billed in the quarter. During the 2Q02, 490 thousand lines were activated. When considering the installation revenue, the 135 thousand address changes and the 102 thousand alternative plans that waive the installation fee must be excluded. Therefore, **253 thousand installations generated revenue in the 2Q02, compared to 376 thousand in the 1Q02.**

Basic subscription revenue reached R\$616.6 million in the quarter, compared to R\$629.7 million in 1Q02. This variation is explained by the growth of 0.7% in the average lines in service (excluding the promotional plans which waive or discount the basic subscription) combined with a drop of 2.8% in the value of the basic subscription per average line in service.

Measured service revenue reached R\$321.1 million in 2Q02, a growth of 6.3% compared to 1Q02, reflecting the increase of 8.6% on the billed local pulses.

Revenues from other local services were derived from address change – R\$10.1 million, local collect calls – R\$16.0 million and rural telephony – R\$2.8 million, which grew in the 2Q02 7.8%, 12.1% and 2.9% respectively.

Public Telephony

Revenue from public telephony grew 12.0% in the quarter, totaling R\$88.8 million. **This growth reflects an increase of 9.1% in credits sold during the quarter,** which reached 1,554 million.

DLD

The growth of 16.8% in revenue from DLD calls during the 2Q02 is explained by the growth of 16.8% in the long distance traffic. It is important to note that the readjustment in DLD tariffs, authorized by Anatel, became effective on June 28th and 29th of 2002 (depending on the branch); therefore, it did not impact the 2Q02 revenue.

Fixed-Mobile

Fixed-mobile revenues grew 11.3% in the 2Q02, totaling R\$544.4 million. The growth is a result of greater fixed-mobile traffic in the quarter (+6.2%) combined with the average readjustment of 9.9% in VC-1 tariff and of 8.8% in VC-2 and VC-3 tariffs, which became effective on February 1st 2002.

Interconnection

Interconnection revenue showed a growth of 4.9% in the quarter. It is important to mention that the 2Q02 revenue includes R\$5.5 million relative to the 1Q02 revenue. Excluding this effect, interconnection revenue dropped 1.0%, reflecting the increase of Brasil Telecom's market share in DLD.

Lease of Means

Lease of means revenue reached R\$57.1 million in 2Q02, compared to R\$72.2 million in the previous quarter, reflecting a drop of 7.7% in the number of leased circuits, combined with a drop of 14.3% in the average price per leased circuit.

Data Communication

Data communications revenue reached R\$117.2 million in the quarter, growing 13.4% in comparison to the 1Q02. The improved performance in the quarter is a result of the growth of:

- **63.9% in the number of ADSL in service, to 89.8 thousand;**
- **58.0% in the number of *Dialnet* accesses billed;**
- **23.7% in the number of *Frame Relays* in service;**
- **2.4% in the number of SLDD lines in service; and**
- **24.9% in the number of IP accesses commercialized;**

Graph 7: Data Communication Revenues

Supplementary and Value-Added Services **Revenue from supplementary and value-added services grew 26.1% in the 2Q02 to R\$ 70.7 million, reflecting, mainly, the growth of 47.1% in revenue from DDG 0800, which reached R\$33.1 million in the quarter.**

The number of intelligent services activated, which includes the Virtual Voice Mail, Follow-me, Call Waiting, Caller ID, among others, **reached 3.7 million in the end of the 2Q02**, stable in comparison to the end of march. Considering the number of lines in service in Brasil Telecom which have at least one intelligent service activated, the **penetration of this type of service was 26.3% in the end of June**, the same penetration registered in March.

Net Revenue/Avg. LIS/month **The net revenue/Avg. LIS/month reached R\$65.1 in 2Q02, a growth of 4.3% in comparison to the 1Q02.**

COSTS AND EXPENSES

As a percentage of net revenues, operating costs and expenses registered a drop of 15.0 p.p., when compared to the 2Q01, and of 3.9 p.p. when compared to the 1Q02.

The evolution of these costs is influenced by variables as scale (distribution of fixed costs over the plant) and dispersion of the market (distribution of the population in the geographic area in which the services are rendered).

Despite the external factors, Brasil Telecom has been strongly working on the variables it can influence.

At the end of June, Brasil Telecom implemented an internal campaign, in which the main objective is to incorporate a permanent attitude of cost reduction and waste elimination in the daily routine of each employee. During 2Q02, it was observed a 11.7% drop in materials expenses (excluding materials accounted as costs of services), which reached R\$1.2 million in the quarter.

Additionally, Brasil Telecom renegotiated its external plant maintenance contracts and initiated the renegotiations with contractors and suppliers of the internal plant maintenance contracts and of the call centers.

Operating Costs and Expenses

Operating costs and expenses (including depreciation) totalled R\$1,405.9 million in 2Q02, an increase of R\$16.7 million compared to the previous quarter. However, operating costs and expenses as a percentage of net revenues dropped to 80.9% in the quarter, compared to the 84.8% observed in 1Q02.

Operating costs and expenses/Avg. LIS/month was R\$52.7 in 2Q02, compared to the R\$52.9 observed in the 1Q02.

Cash Cost

The cash cost (operating costs and expenses, excluding depreciation and amortization) reached R\$915.3 million in the 2Q02, practically stable compared to the 1Q02.

The cash cost/Avg LIS/month was R\$34.3 in the 2Q02, a drop compared to the R\$34.6 observed in the 1Q02.

Graph 8: Operating Costs and Expenses Breakdown (Excluding Depreciation)

Net reduction of 989 employees in the quarter

Brasil Telecom Participações' payroll had a total of 6,129 employees in the end of June 2002, compared to 7,118 in the end of March. The net reduction of 989 employees is the result of 1,252 dismissals and 263 admissions in the quarter.

Personnel

Personnel costs and expenses reached R\$109.9 million in the 2Q02, 1.3% above the total registered for 1Q02. The increase is explained by the fact that in the costs for this quarter, approximately R\$14.9 million are related to unemployment compensation, as a result of the reduction in the number of employees.

Excluding compensations from the total, personnel costs and expenses were of R\$95.0 million, representing a reduction of 12.4%, or R\$13.5 million, in the 2Q02, compared to R\$108.5 million in the 1Q02.

Productivity

Brasil Telecom Participações reached a productivity ratio of 1,459 LIS/employee in the 2Q02, **representing an increase of 17.3% over that presented in the 1Q02**. This improved performance is a reflex of the net reduction of 989 employees in the quarter, together with a growth of 1.0% of the network in service.

Graph 9: LIS/Employee

Materials

Material costs and expenses reached R\$24.6 million in the 2Q02, representing an increase of 18.2% over the costs and expenses in the 1Q02, which is explained, basically, by higher costs with material for telephone cards.

Subcontracted Services

Subcontracted services costs and expenses, excluding interconnection and advertising & marketing, **reached R\$279.0 million in the 2Q02**, representing an increase of 5.6% compared to the 1Q02. However, as a percentage of net revenues, subcontracted services costs and expenses dropped to 16.1%, stable when compared to the 1Q02. When compared to the 2Q01, this percentage dropped by 1.2 p.p.

Contracts Renegotiations

Continuing its cost reduction program, Brasil Telecom renegotiated the external plant maintenance contracts with suppliers and contractors.

The new contracts, valid as of August 1st, present a 15% reduction in comparison to the old ones. **This represents a monthly cost reduction of approximately R\$3.0 million, resulting from the drop of 9.5% in maintenance cost per individual access and 24% per public telephone.**

Interconnection

Interconnection costs totaled R\$383.6 million in the 2Q02, an increase of 8.4% compared to the costs registered in the previous quarter. **Of the total costs with interconnection, R\$360.6 million refer to fixed-mobile interconnection costs (R\$329.5 million in the 1Q02) and R\$23.0 million to fixed-fixed interconnection (R\$24.3 million in the 1Q02).**

The increase of 9.4% in the fixed-mobile interconnection costs is explained by the following factors:

- Growth of 6.2% in fixed-mobile traffic in the 2Q02, and
- Readjustment of 10.1%, on April 1st, of the TU-M practiced by Tele Centro Oeste Celular.

Losses with Accounts Receivable/Gross Operating Revenue drops to 2.7%

The losses with accounts receivable reached R\$65.8 million in the 2Q02, stable when compared to those registered in the 1Q02 (R\$65.1 million). This stability may be credited to several actions implemented by Brasil Telecom, of which we note:

- Average of 47 thousand tele-notices/day throughout the 2Q02;
- At the end of June, 60 thousand pre-paid phones had been sold to customers that have credit problems. Such phones are available only in idle switches and are not object of marketing campaigns;
- Complete training of the entire staff involved with tele-collection; and
- Campaigns with the goal of encouraging the payment of overdue bills.

The actions implemented, in conjunction with the growing revenue in the period, **led to a reduction in the Losses with Accounts Receivable/Gross Operating Revenue to 2.7% in the 2Q02, compared to 2.9% in the 1Q02.**

Graph 10: Losses With Accounts Receivables

Effective Losses

The effective losses totaled R\$62.0 million in the 2Q02, compared to R\$59.6 million in the 1Q02 (+4.0%). Therefore, the losses represented 2.6% of gross revenue in the 2Q02.

Deducting the provision for doubtful accounts of R\$152.9 million, Brasil Telecom's net account receivable totaled R\$1,385.4 million at the end of June 2002.

Table 7: Gross Accounts Receivable

	Jun/01	Set/01	Dez/01	Mar/02	Jun/02

Overdue (over 90 days)	10.3%	10.2%	10.0%	11.6%	12.5%

Lay-off Expenses

Lay-off expenses reached R\$3.1 million in the 2Q02.

Other Operating Costs and Expenses/Revenues

Other operating costs and expenses/revenues totaled R\$17.0 million in the 2Q02, **a drop of 62.0% compared to 1T02.**

In the 2Q02, **Brasil Telecom Participações** had **R\$61.9 million of other operating revenues**, mainly composed of:

- **Expense recovery in the amount of R\$17.4 million, relative to Fundação Sistel de Seguridade Social (Sistel Pension Fund)**, resulting from a recovery of a part of the expenses related to the defined contribution retirement plan, derived from the amnesty of the legal increment due to the adhesion to *Regime Especial de Tributação (RET) - Medida Provisória # 2,222/01*. This revenue corresponds to exceeding resources from the defined contribution retirement plan, managed by Sistel;
- **Revenues from billing and collections** which totaled R\$4.0 million in the period, 41.1% over the 1Q02;
- **Revenues from advertisement in telephone directory**, totaling R\$1.6 million.

EBITDA	731.4	44.6%	822.6	47.3%	2.7 p.p.

¹ Excluding depreciation and amortization.

EBITDA totaled **Brasil Telecom Participações'** EBITDA reached R\$822.6 million in R\$823 million in the 2Q02, surpassing in R\$91.2 million that obtained in the the 2Q02 1Q02, representing a growth of 12.5%.

EBITDA Margin In the 2Q02, EBITDA margin reached 47.3%, an increase of 2.7 p.p. compared to the previous quarter.

In the 1H02, EBITDA margin reached 46.0%, an increase of 7.3 p.p. compared to 1H01.

Adjusted EBITDA Margin Adjusting EBITDA by: (i) provisions for contingencies of R\$8.9 million, (ii) lay-off expenses of R\$14.9 million, (iii) Sistel expenses recovery of R\$17.4 million and (iv) lay-off expenses of R\$3.1 million, **EBITDA totaled R\$832.2 million, 11.0% higher than the one registered in the 1Q02.** Calculating the EBITDA margin by using the adjusted EBITDA, **adjusted EBITDA margin reached 47.9% in the 2Q02.**

EBITDA/Avg. LIS/month In the 2Q02, **EBITDA/Avg. LIS/month reached R\$30.8, or 10.6% above the R\$27.9 million registered in the 1Q02.**

FINANCIAL RESULT

Table 9: Consolidated Financial Result

R\$ million	1Q02	2Q02	Δ
Financial Revenue	40.6	97.7	140.7%
Local Currency	36.8	51.1	39.0%
Foreign Currency	3.8	46.6	1125.4%
Financial Expense	(147.6)	(297.8)	101.8%
Local Currency	(108.6)	(117.9)	8.6%
Foreign Currency	(11.9)	(49.8)	318.8%
Interest on Shareholders' Eq	(27.1)	(130.1)	380.1%
Financial Result	(107.0)	(200.1)	87.1%

Financial Revenue In the 2Q02, the financial revenue in local currency grew 39.0%, reaching R\$51.1 million. This growth is due to higher interests from a larger average cash position during the quarter.

In the 2Q02, the financial revenue in foreign currency was R\$46.6 million, reflecting the maturing of swap contracts during the quarter.

Financial Expenses In the 2Q02, the financial expenses in foreign currency reached R\$49.8 million. The greater expense in the quarter reflects the foreign exchange variation due to a larger average exchange rate during the period.

Interest on Shareholders' Equity The Interest on Shareholders' Equity of R\$130.1 million in the 2Q02, accounted for as financial expense, refers to the credit and payment of R\$116.0 million related to the fiscal year 2002, approved in the Brasil Telecom Participações S.A. Board of Director's Meeting, which took place on June 24, 2002, combined with Minority Interest of approximately 34.5% over the Interest on Shareholders' Equity of R\$40.0 million, credited by Brasil Telecom S.A. in the 2Q02.

OTHER ITEMS

Amortization of Reconstituted Goodwill In the 2Q02, Brasil Telecom amortized R\$31.0 million in reconstituted goodwill from the CRT acquisition (which has no impact on cash flow), accounted for as non-operating expenses.

The cash position in the end of June was of R\$757.0 million.

CORPORATE GOVERNANCE

Joining Level 1 of Corporate Governance On May 9, 2002, Brasil Telecom Participações S.A. joined the Level 1 of Corporate Governance of the São Paulo Stock Exchange (Bovespa), becoming part of the group of publicly traded companies which adopt policies valuing the quality and precision of information to the market.

Brasil Telecom Participações S.A. and its subsidiary, Brasil Telecom S.A., were the first companies in the telecommunications sector to join the Corporate Governance practices established by Bovespa.

Manual for the Disclosure and Use of Information and the Trading of Securities On July 23, 2002, Brasil Telecom Participações S.A. released its *Manual for the Disclosure and Use of Information and for the Trading of Securities*. The Manual broadens the investor relations' policy that the Company already had, and meets the standards set by the CVM (Brazilian SEC) in the Instruction 358. Controlling Shareholders, Directors, Officers and other employees with access to relevant information must sign a term of acceptance of the Manual, whose objective is to guarantee higher standards of conduct and transparency.

The Manual can be divided into two parts. The first, mandatory according to the CVM Instruction 358, defines the policy for disclosing information to the public, and contains the rules for disclosing material facts to the market. The second, optional according to the same Instruction, defines the standards that regulate the trading of shares (or any other security) issued by the Company, by Brasil Telecom's Controlling Shareholders, Directors and Officers.

STOCK MARKET

Change of the trading symbol in Bovespa

As of June 3, 2002, the Brasil Telecom Participações S.A. shares started to be negotiated in Bovespa under new ticker symbols: "BRTP3" for common shares and "BRTP4" for preferred shares. The objective of this change is to simplify the identification of the Company's shares in Brazil.

Table 16: Stock Performance

	Closing Price by Jun/28/02	Performance
